

Patient: Francis, B.  
Location: Colfax, KY  
Diagnosis: Sciatica

*I've lived with chronic back pain for years. I am retired and love to work in our garden during the spring. One day I bent over and felt something pull in my lower back. Since then, life was just not enjoyable and I was actually scared to work in the garden because of the pain. I never liked medication so I got massages and used our hot tub to relieve the pain. I read about TENS in our local newsletter and decided to ask my doctor about it. Within a few days I received a Criterion TENS and away I went. Criterion's customer service was great with the instructions and my questions. Now I walk everyday for at least a mile with my husband and I am back in my garden.*

*Thank You SO MUCH,  
Francis*
